PROJECTS

WanderSpark

<https://wander-spark.herokuapp.com>

WanderSpark is a digital travel planner where the user can easily plan their trip by pinning their point of interests all in one dashboard.

This app was designed with React, React Materialize, React Toastify, Express, MongoDB, Express, Passport, and Google Places API.

Eat-da-Burger

<https://eatdaburger-jkim.herokuapp.com/>

A form where the user will add their desired burger and will then have the option to "devour" their burger after clicking the button.

This app was designed using MySQL, Node, Express, Handlebars, and an ORM.

Bamazon

<https://github.com/jasminepkim/Bamazon>

Bamazon is an interactive storefront app that will display a list of items ready for purchase. The app will take the customer's orders and will deplete its inventory stock.

This app was designed with Node and MySQL.

COMMUNITY INVOLVEMENT

Women Who Code - Events Volunteer

October 2017 - Present

Ashley Lane Fitness - Front Desk & Bookkeeper Volunteer

September 2016 - May 2017
